PROFILE SUMMARY

Motivated and detailed-oriented Information Technology undergraduate with strong analytical and problem-solving skills. Adapt at developing reusable, maintainable, and responsive front-end components using HTML, CSS, JavaScript and skilled in data cleaning, visualization, dashboard development, and business intelligence reporting. Passionate about transforming raw data into actionable insights to support data-driven decision-making. Seeking to leverage technical expertise and soft skills to contribute effectively to a growth-driven organization.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University, Lucknow, India

Bachelors of Technology in Information Technology

(2022-2026)

CGPA: 7

PROJECTS

Sorting Algorithm Visualizer

(Nov2024-Dec2024)

- Developed an interactive Sorting Algorithm Visualizer to demonstrate the working of popular sorting algorithms through real-time animations.
- Implemented multiple sorting techniques :- Bubble Sort, Selection Sort, Insertion Sort, Merge Sort, and Quick Sort.
- Designed a responsive and user-friendly interface to visualize algorithm execution step-by-step.
- Optimized visualization performance to handle arrays of varying sizes efficiently.
- Incorporated user controls for generating random datasets, adjusting sorting speed, and selecting different algorithms.
- Utilized JavaScript DOM manipulation and event handling to create smooth interactive animations.

Customer Trends Data Analysis

(Oct2025-Nov2025)

- The goal of the project is to stimulate a corporate-grade end-to-end data analytics workflow, demonstrating the ability to translate raw data into strategic business intelligence.
- Data Preparation, Modeling & Exploratory Data Analysis.
- Stimulate business transactions, and run queries to extract insights on customer segments.
- Build an interactive dashboard using Power BI that highlights key patterns and trends.
- Made a clear project report summarizing our key findings and business recommendations.

FINAID: AI-Driven Financial Adviser

(Jan2026-Mar2026)

- Developed an AI-powered Financial Advisor system to provide personalized financial recommendations based on user income, and spending patterns.
- Utilized Machine Learning algorithms to predict future expenses, savings, and investment opportunities.
- Implemented data pre-processing and analysis techniques to identify financial trends and generate actionable insights.
- Utilized Python libraries such as Pandas, and Matplotlib for data manipulation, analysis, and visualization.
- Designed interactive dashboards for visualizing financial performance, budgeting, and investment analysis.
- Conducted model evaluation and optimization to improve prediction accuracy and recommendation quality.

SKILLS SET

Languages:-

HTML | CSS | JavaScript | React | Python

Tools & Platforms:-

Visual Studio | Github | Jupyter Notebook | Power BI | Excel | SQL | PostgreSQL | Matplotlib | Netlify

Soft Skills:-

Collaboration & Teamwork | People Management | Communication | Adaptability

CERTIFICATIONS

- Web Technology – Swayam (NPTEL)
- Building Data Analyst AI Agent – Analytics Vidhya
- International Conference on Advances in Multidisciplinary Engineering
